

C19 HW-6  
EKG

1. What do the letters EKG mean?
2. What happens during the P wave?
3. What happens when the myocardiocyte depolarizes?
4. What triggers the muscle contraction?
5. Between which two points is atrial systole (contractiion)? (remember, depolarization and contraction are different evernts)
6. When do the ventricles depolarize?
7. When are the ventricles contracting?
8. What does the T wave tell us?
9. Where in the EKG do we find the atria repolarization?
