

## C20 - HW4

### How Capillaries Work

1. What are the tiniest vessels?
2. What are they called?
3. What occurs at this location?
4. How thick is this vessel's wall? Tissue type? Supported by?
5. How do RBC pass through these vessels?
6. Does the blood move fast or slow through these vessels?
7. How numerous? How far may a cell be from any one of these vessels?
8. How many miles of capillaries do you have in your body?
