

Hello All:

Great job by all. We have over 30 students on Discord. I am still a neophyte and hope to get up to speed shortly. So for the students with experience with Discord, us neophytes will surely appreciate your help so we can all use this platform more efficiently to achieve our goal. We need to learn human physiology. And we can have fun while we learn. Keep up the good work.

So if you are not on Discord, please submit your user names to the Discord platform. When you enter your username you become a member of the Discord group. The group represents all the students in my Bio2710 class (approximately 50 students). As a group member, you may be able to communicate with all other group members.

I will assign individual students to “teams”. A team will be a collection of 4 or 5 students. Team members may schedule time so they can review their homework assignments before you submit them for credit.

Discord will allow groups and teams to communicate in real time either with text or voice. Once we become familiar with Discord, we will be able to incorporate more advanced features.

Team One

Natasha Saad
Aida Sijamhodzic
Alan Harris
Hassam Chowdey
Vanessa Andrianos
Julianne Demorest

Team Two

Tiffany Davis
Shayla House
Jared Haught
Jacqueline Jones
Marylynn Ignacio

Team Three

Mikayla Hampton
Rachael Bieda
Courtney Bryson
Kaitlyn Lorenz
Rachael Bieda

Team Four

Brenda Oneil
Sam Grady
Veronica Croke
Mario Cali
Courtney Minnella

Team Five

Justina Colli
Lindsay#0693
Madison Bauman
Ancona Madeline

Team Six

Kylie Rogalski
Rachel Phiefer
Emily Thome
Jessica Hook

Team Seven

Gillian DeBruyne
Allison Maskowski
Brenda O Neil
Madline Ancona
Jenna Rzeppa

Please Note: If you are not in Discord yet then call me. I am also going to be reaching out to students so I can join individual teams to show how you can pull my lecture slides into a team meeting.
